

TRAMPOLINE WORLD CUP 2026

& COIMBRA GYM FEST
3-5 JULY

4-5 JULY 2026

COIMBRA | PORTUGAL
PAVILHÃO M. M. MÁRIO MEXIA

PROGRAM

COIMBRA WELCOMES YOU WITH OPEN ARMS!

It is with great joy and pride that Coimbra once again welcomes the Trampoline Gymnastics World Cup, an event that carries the name of our city beyond borders and strengthens its position on the international sporting stage.

Coimbra embraces sport with enthusiasm and a strong sense of identity. It is not merely the host of this competition — it is part of its very soul. Welcoming athletes from all over the world, each with their own cultures, stories, and journeys, is also a way of affirming what we believe in: sport as a space for connection, self-improvement, respect, and union.

This event brings together some of the world's finest gymnasts and places Coimbra at the heart of a competition of excellence, capable of inspiring everyone who takes part and everyone who watches.

More than a competition, this is a special moment for Coimbra. It is a moment that brings the city together, engaging clubs, associations, and institutions, and once again

Ana Abrunhosa
President of the
Municipality of Coimbra

demonstrating our ability to host and deliver major sporting events with quality, dedication, and enthusiasm. It is also an opportunity to showcase the very best of our region to those who visit us.

We will continue to work with commitment, responsibility, and a true spirit of cooperation, alongside all our partners, to ensure that Coimbra continues to move forward on this path of ambition, excellence, and openness to the world.

To all athletes, coaches, judges, volunteers, and members of the organizing team, I extend my sincere appreciation and a warm welcome. I hope this World Cup will be not only a remarkable sporting event, but also an unforgettable experience filled with shared moments, excitement, and discovery for everyone who joins us.

Coimbra welcomes you with open arms. Enjoy this special occasion and make yourselves at home!

Luís Arrais

President of the
Gymnastics Federation of Portugal

Welcome to Coimbra! Welcome to Portugal!

In 2026, Coimbra once again dresses up as the world capital of Trampoline Gymnastics. Our historic city welcomes the best gymnasts in the world, inviting everyone to enjoy the region's heritage, culture, and unique gastronomy.

WELCOME TO THE CITY OF COIMBRA!

The Local Organising Committee (LOC) has meticulously prepared every detail to ensure that athletes, coaches, and judges enjoy an unforgettable experience. We wish all delegations an excellent competition.

**Fly high!
Good luck!**

EVENT

The Gymnastics Federation of Portugal and the Associação Académica de Coimbra, under the auspices of the World Gymnastics and with the Coimbra Municipality support, will organize the Trampoline World Cup and the Trampoline International Competition.

TRAMPOLINE WORLD CUP

The World Cup Series in Trampoline Gymnastics in 2026 consists of six events in Baku (AZE), Alkmaar (NED), Arosa (SUI), Coimbra (POR), Riccione (ITA) and Cottbus (GER). Two weeks after the final event, the World Championships will be held in Nanjing (CHN).

These are great events, staged in attractive and well known cities and venues, with guaranteed TV coverage.

Their aim is to showcase the world's very best gymnasts in media and public friendly surroundings.

This competition is reserved for national federations and senior gymnasts in Individual Trampoline, Synchronized Trampoline, Double Mini-Trampoline and Tumbling.

At each event, the gymnasts will have the opportunity to earn World Cup Points, which will determine the World Cup Series Ranking List.

The top 8 gymnasts or pairs from the Qualifications will qualify for the Finals (max. 2 individuals or 1 pair per national federation per discipline).

"Trampolining is an art form. It requires grace, precision, and skill to execute a perfect routine."

Dan Millman

TRAMPOLINE INTERNATIONAL COMPETITION

The Trampoline International Competition brings young athletes from all over the world to compete in Individual Trampoline, Double Mini Trampoline and Tumbling.

COIMBRA GYM FEST

TECHNICAL DATA

TRAMPOLINE

A Trampoline exercise is characterized by height, continuous rhythm, rotational elements, executed without hesitation or pause, in a performance demonstrating a variety of front and back elements, with or without twist, body control, good form, good execution and regularity of height.

Competition consists of two exercises in the Qualifying round and only one in the Finals, and each exercise is made up of 10 elements.

The first Trampoline exercise in the Qualifying event contains free and compulsory elements, and the execution of this exercise alone is taken into account.

The second exercise in the Qualifying event and the Final exercise are free exercises, in which Execution is added to Difficulty, Time of Flight and Horizontal displacement, resulting in the total score of the exercise.

In the Senior category, two exercises are performed, with only the higher-scoring one counting toward the final ranking.

SYNCHRONIZED

In the Pairs competition, the simultaneous Executions of the two gymnasts have special value, which added to the Difficulty and Execution result in the final score.

DOUBLE MINI-TRAMPOLINE

A pass on the DMT is characterized by high, continuous rhythmic, rotational jumping elements, without hesitation or intermediate straight bounces.

A DMT pass should demonstrate a variety of forward and backward twisting or non twisting elements. The pass should show good control, form and execution.

In a pass, a maximum of 3 contacts with the apparatus are allowed with no intermediate bounce between the elements. Each pass must end with a dismount element performed from the spotter/dismount zone to the landing area.

On DMT gymnasts perform two exercises in the Qualifying round, one exercise in Final 1 and then the top 4 perform one exercise in Final 2. Each DMT exercise consists of 2 elements. The final score results from the sum of Difficulty and Execution.

TUMBLING

Tumbling is characterized by continuous speedy, rhythmic, rotational jumping elements without hesitation or intermediate steps. A tumbling pass should demonstrate a variety of front, back, and twist elements. The pass should show good control, form, execution and maintenance of tempo.

A Tumbling exercise consists of two series in the Qualifying competitions, one series in the Semifinal, one in the Final 1 (best 8) and another one in the Final 2 (best 4). Each Tumbling series consists of 8 elements. The final score results of the sum of Difficulty and Execution.

To ensure that all information remains as accurate and up to date as possible, we are sharing the link where start lists and competition results will be continuously updated throughout the event.

Should you have any questions or need assistance, members of the Local Organising Committee (LOC) will be happy to help.

WHAT TO DO IN COIMBRA

During the week of the Coimbra Gym Fest and the Trampoline World Cup, the Coimbra City Celebrations will also be taking place, honoring Queen Saint Isabel, the patron saint of the city and one of Coimbra's most cherished historical figures.

Throughout these days, visitors will have the opportunity to experience the city's festive atmosphere, with concerts, cultural

events, and activities taking place across Coimbra's main venues, including Praça do Comércio, Praça da Canção, and Jardim da Sereia.

At Praça da Canção, visitors can also enjoy the traditional fair taking place throughout the celebrations, featuring amusement rides, stalls with Portuguese products, local food and drinks, and many other attractions.

Take the opportunity to enjoy not only world-class gymnastics, but also the traditions, culture, and vibrant spirit of Coimbra.

Fit on track

Enjoy the comic “F(a)it on Track”!

Lara is an artist. She was diagnosed with metabolic disorder when she turned 25. What would you have done? Nutrition is now an important part of Lara’s life, and she decided to take her health into her own hands. But why stop there? Why not motivate others? So, Lara hosts a monthly dinner with her friends, enjoying healthy, but delicious, homemade food. This particular Saturday evening in June, Lucas, a friend who has been abroad completing his latest movie, finally joins. He is feeling bloated and worries about weight gain. Karol, the biologist of the group, demystifies several aspects about fat and weight and the struggles the body faces when provided with foods rich in added salt, sugars, and poor-quality fats. Fit on track is a short comic about the beauty of understanding our body and discovering metabolism. Lara and friends finish the night seeing Lucas’ movie, and thinking of what else they can do to make others aware of what they have learned. “F(a)it on Track” was created by the PAS GRAS teams.

Come and discover the PAS GRAS activities all around the Gymfest!

PAS GRAS aims to clarify the role of lifestyle, mental health, family, socioeconomic factors and the environment in the development of obesity, and their interaction with the genetic and metabolic characteristics of each individual; the project targets children (3-9 years old), adolescents (10-18 years old), young adults (19-25 years old) and their families. PAS GRAS studies cellular and molecular mechanisms underlying the protective effect of Mediterranean diet components and physical activity. Additionally, the PAS GRAS Campaign aims to raise knowledge and awareness about the metabolic risks of obesity and to promote healthy habits, namely through sport and physical activity. PAS GRAS (DOI: 10.3030/101080329) is a Horizon Europe Research and Innovation Action (RIA).

Fit on track

Fat may have other functions besides storing energy.

Male orangutans store fat in facial flanges during adolescence and that may be related with hormonal and reproduction fitness.

Dolphins have the forehead adipose tissue intimately connected to their sophisticated sonar system, used to navigate and locate food.

Elephants have large plantar adipose pads at the base of their legs that absorb shock during walking. They also may sense long distance sound waves that spread through the soil.

Single Cell Algae

Actually, almost all organisms store excess energy for future needs in the form of fat, from unicellular life-forms to humans.

Back to us, besides storing fat, adipocytes have the ability to sense and secrete systemic and local signals and hormones, related to appetite, reproduction, coagulation, and the vascular and immune system. The adipose tissue is in fact a sophisticated endocrine organ.
